May 29, 2013

Mr. Paul,

This letter is in reference to order numbers: 23316 and 171352 that we galvanized for Vulcan Threaded Products several years ago.

The reason I remember this particular order is because it was the only order (5 to 6 truckloads) that I can ever recall coming from Vulcan that was both blasted and tarped.

We were alerted when each load was en route so that we could process it as soon as it arrived.

When the material was unloaded we chained it, flash pickled and galvanized it, per Vulcan instructions.

Regards,

David S. Ware

President/CEO
