Re: 2016 MTC/ABAG Scenarios for Plan Bay Area 2040

Dear Mr. Kirkey:

The City of Vacaville would like to express appreciation for the opportunity to comment on the three scenarios prepared for Plan Bay Area 2040, namely, the Main Streets Scenario, Connected Neighborhoods, and Big Cities. Our understanding is that all three scenarios would enable the Bay Area to potentially meet obligations for greenhouse gas reduction (SB 375), housing production, and economic growth. All three scenarios present very aggressive strategies to concentrate development in Priority Development Areas (PDAs) and town centers and to expand multi-modal opportunities.

Of the three scenarios, the City of Vacaville is most supportive of the Main Streets Scenario (Scenario 1). We believe this scenario will result in a more equitable distribution of discretionary transportation spending and includes a realistic recognition that "traditional" suburban growth will continue.

The City of Vacaville joins the Cities of Suisun City and Fairfield in expressing concern about the transportation investments proposed for the second scenario, the "Connected Neighborhoods Scenario."

The three cities share several proposed transportation projects in common, namely the Jepson Parkway, I-80/I-680/SR 12 Interchange and the Solano Express Bus Service Improvements. All three of these projects are included in the transportation improvements for Scenario 1 (Main Streets), and we agree with this inclusion.

Our concern is over the exclusion of all three projects from the Connected Neighborhoods scenario. Our three cities will be taking the lion's share of future residential growth in Solano County, and we expect some of the new residents of our communities to commute to jobs in the Bay Area. A combination of the regional Express Lane network with the Interchange improvements and the Express Bus improvements create by far the greatest potential for these commuters to use some form of transit for their commute trips.

Not all of the trips through the Interchange or on Solano Express buses, or in carpools and van pools, will be residents from our cities commuting into the inner Bay. They will be commuting to jobs and classes in Vallejo and Benicia, just as residents of those cities will be coming to work, learn, and generally participate in life in our communities. No matter how those local trips are made – and the Solano Express Bus Service Improvements will make it much more attractive for those trips to be made by bus – they will mostly pass through the I-80/I-680/SR 12 Interchange.

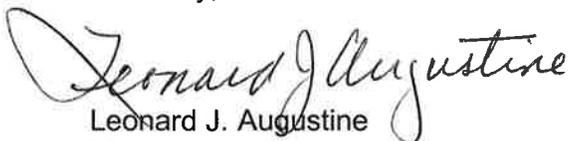

Many trips between our three cities will be able take an alternative route when the Jepson Parkway is built, which will link the three cities along their eastern borders and will avoid I-80. The Jepson Parkway is a bicycle-and transit-friendly corridor, with the new Fairfield/Vacaville Capitol Corridor train station at its center.

The Connected Communities scenario anticipates significant development in our three cities, although not as much as does the Main Street scenario. The existing congestion in the I-80 Corridor, from pass-through commuters, freight movement and Solano commuters, justifies the inclusion of the I-80/I-680/SR 12 Interchange, Solano Express Bus Improvements and Jepson Parkway projects in both scenarios.

The City of Vacaville does not support the Big Cities scenario. We do not believe this scenario represents a realistic framework for growth and will result in lack of investment in needed transportation infrastructure in Vacaville and Solano County. As in Scenario 2 (Connected Neighborhoods), the omission of Jepson Parkway, I-80/I-680/SR 12 and Solano Express Bus Improvements will have serious regional impacts.

The City of Vacaville looks forward to participating in the discussion about Plan Bay Area 2040. If you have any questions about this letter, please feel free to contact Community Development Director Barton Brierley at 707-449-5361 or barton.brierley@cityofvacaville.com.

Sincerely,

Leonard J. Augustine
Mayor
