Subject: please grow smart

Sorry I can't make the Santa Clara County workshop tomorrow evening. My input is:

The only way to maintain our quality of life in the Bay Area is to grow up, not out, keeping in mind quality of life for those stacked up in denser housing by providing sufficient parks and especially community gardens. Denser housing will support expanded and improved transit. Making all streets comfortable for cyclists and pedestrians will encourage those alternative transportation modes. Here's to plenty of bike racks and no free parking for motor vehicles!
