Subject: creating sustainable communities

I am a homeowner in Berkeley. I support applying the principles listed below regarding urban growth to prevent sprawl to update Plan Bay Area as stated by Greenbelt Alliance. I am unable to attend the meeting in Alameda county, but want my views to be considered.

Thank you,

Marilyn Williams

1. Guides growth in ways that protect our region's natural and agricultural lands from sprawl and make our communities even better places to live
2. Includes strong policies and investments to tackle housing affordability and displacement
3. Provides more opportunities for walking, biking, and transit.
