This comment was also included in ACWD's comment letter for the Draft Plan's draft EIR. Sea Level Rise Adaptation Approaches, Page 94 ACWD appreciates that the Draft Plan considers a number of approaches to protect, restore, and/or create ecosystems in response to projected sea-level rise and inundation. ACWD recommends that the Draft Plan be updated to also consider the impacts from seawater inundation into coastal aquifers due to sea-level rise, including threats to housing and infrastructure, damage to pipelines and sewage systems, and mobilization of shallow groundwater contamination.
