[redacted] [1] *Zip* [redacted] *Topic* Housing *Comment* It seems to me that some of the areas marked for development, e.g., along 101 in Larkspur/Corte Madera, are in the flood zone according to the NOAA interactive map. It would be very helpful if that map and the growth geography map overlaid each other so that one could see that the boundaries of the areas marked for development did not lie within the flood zone when the seas rise by 1 foot by 2050 (a conservative estimate). ABAG/MTC should not ignore those flood zone boundaries in the hope that "something will turn up" to mitigate a planning disaster. [1] mailto:[redacted]
