Subject: Plan Bay Area 2050

External Email

Hi Chirag,

I hope you are doing well.

I'm writing because I am trying to understand the funding available for implementation of the environmental goals and actions.

Under PBA 2050, MTC/ABAG have introduced an "environmental" component which is appreciated. The documents identify that

it is estimated \$19 billion will be required to implement the proposed actions. Is any of this money in hand or is it that PBA 2050

would lobby and voice support for funding directed towards implementation of the environmental goals, like preserving open space and implementing nature-based solutions?

Regards,

Carin High
