Subject: Plan Bay Area GHG reductions

External Email

Hello Dave,

Thank you for your presentation Monday June 14 for the East Bay focus on Plan Bay Area 2050.

I appreciate your comment that the whole plan includes a "suite" of actions that can achieve 50% GHG reductions. This is very encouraging. Can you point me to any documentation of this suite of actions? I see the 19% per capita VMT discussion, and there is some discussion of building decarbonization and electrification of transportation, but I don't see it all put together.

Also, just so you are aware, the [Climate Emergency Mobilization Task Force](#) is having a second round of summits this summer. We are trying to take the 200+ actions identified in the first round last summer, and focus on what key actions could make up a toolkit of climate actions that each city/county could take. I'm working on the "Clean and Just Transportation" summit on Friday August 20, 9 - Noon. We are still working on the agenda, but I would like to invite you and any members of your staff to participate (e.g. I thought Anup Tapase gave an excellent presentation Monday). In fact, now that I think about it, that would be a good role for MTC to play to help ID best practices and build up that toolkit!

Thanks for all your excellent work, and I hope we can connect soon.
