Is there any grant or subsidy available for transportation companies? The airport transportation service that served in Napa county and Solano county has not reopened and may not be able to. Is there something they can apply for that would help them restart and maintain the service? Right now the only options are to drive to the airports or take a bus to the El Cerrito del Norte BART Station. That bus takes at least an hour and 20 minutes to get to the BART station and then there is the BART ride time. That adds too much time and trouble with luggage to get people out of their cars. The only way you will get people out of their cars is to make it easy.
