Subject: Responses to PBA 2050 DEIR Scoping Comments ?

\*External Email\*

Hi, Dave — hope all is well. I've looked at Appendix B to the PBA 2050 DEIR, and noticed that I cannot seem to find any response(s) to Scoping comments that were submitted. Am I missing something? If there is a summary of responses, could you please tell me where it is?

I noticed that the Intro to the section states that "Note: the EIR does not respond directly to the comments; rather, it addresses environmental issues related to the project that are associated with the project, including issues raised in these comments."

If there are not responses to comments submitted, even if grouped together, could you tell me why there seems to be a change from previous practice? And in particular, could you tell me where in the DEIR are issues related to sea level rise addressed?

Thanks as always.
