That could be too late. The Plan Bay Area 2050 has not yet received CEQA approval so it is not too late to make changes.

Hello Rick,

Draft Plan Bay Area 2050 was released in May 2021, but the new state tsunami maps were not made available by the State until July 2021. Therefore, these datasets were not available for use in Plan Bay Area 2050. We can certainly consider how to use them when developing the next iteration of Plan Bay Area in a few years' time.

Were the new tsunami maps below used when determining resilience in Plan Bay Area 2050?
