I heard a plan recently that is so outlandish that maybe it's fake. If so, my apologies for wasting your time. But on the off chance it is real: a plan that mandates wfh for large employers is absurd. Even contemplating it shows a disregard for seriousness. It's anti density, pro nimby nonsense, and I hope it will be rejected unanimously by the MTC. I will work against whoever gives it any credence.

Thank you,

Scott Brizzolara
