It appears the plan will add over 2100 housing units in Saratoga in coming years. This is a over 20% increase in the housing units (Saratoga has now about 10000).

Saratoga doesn't have many offices, not much of public transportation And road capabilities as well. With the new housing units, it will make the already congested traffic even worse.

The number doesn't make any sense, it should be assigned a much lower number of housing units.
