Why is this not included, or even discussed in Plan Bay Area 2050? This east-west rail connection between the I-80 and US-101 corridors will be vital in providing a more resilient, multi-modal transportation linkage for both passengers and goods movement to the 4 north bay counties. Plan Bay Area 2050 must be modified to include support for this regional rail linkage by 2040, consistent the California State Rail Plan. [1] mailto:[REDACTED]
