Dear MTC:

Based on reading the handout for the Draft Plan of the Plan Bay Area 2040, and on Ken Kirkey's presentation to the BAAQMD Climate Protection Committee on May 18, I favor the plan. The people of the greater Bay Area are in significant trouble because of the immense disparity in housing units relative to jobs created, and because of the (largely resultant) transportation crisis. The Plan is cognizant of and draws attention to these issues. While it does not solve the affordable housing crisis, much of this is a matter of shortsighted and ill-tempered local political decisions.

Thank you.

Sincerely,
Rebecca E. Skinner
